Aayush Mittal

Phone: +91 9911516377 | Email: mittalaayush570@gmail.com | LinkedIn: aayush-mittal | GitHub: mittal987-alt | New Delhi, India

Professional Summary

Full-Stack & AI Software Engineer specializing in scalable web application development, microservices, and modern Generative AI architectures (RAG, Agentic AI, LangGraph). Proficient in C++, Python, TypeScript, React, Next.js, FastAPI, and Cloud/DevOps tooling. Track record of building production-ready platforms, optimizing API performance, and building autonomous agent workflows.

Technical Skills

Programming Languages: C++, Python, SQL, TypeScript, JavaScript, Dart
Frameworks & Technologies: React.js, Next.js, Node.js, Express.js, FastAPI, Flutter, Tailwind CSS, REST APIs, WebSockets
Databases & Storage: MongoDB, PostgreSQL, Firebase, SQLite, Vector DBs (Qdrant)
Machine Learning & Generative AI: LLMs, LangGraph, LangChain, RAG, Agentic AI, Prompt Engineering, PyTorch, TensorFlow, Hugging Face, Scikit-learn, OpenCV
Tools, Cloud & DevOps: Docker, Kubernetes, Git, GitHub Actions, AWS, Postman, Vercel, Render

Experience

Zavaas Academy Apr 2026 – Jun 2026
Frontend Developer Intern Remote
- Engineered responsive, mobile-first web interfaces using React.js and Tailwind CSS across 15+ platform modules, improving page rendering speed by 25%.
- Integrated 10+ RESTful API endpoints with optimized client-side caching, resolving state synchronization latency and boosting UI responsiveness.

Nayoda Jun 2026 – Jul 2026
Full Stack Developer Intern Remote
- Architected full-stack features utilizing React.js, Express.js, and MongoDB, implementing secure JWT authentication and role-based access control (RBAC).
- Designed RESTful microservices and optimized MongoDB indexing schemas, achieving sub-100ms database query response times for concurrent user requests.

Projects

Bazarri | *Next.js, Node.js, MongoDB, Socket.io, AI Services* GitHub | Live Demo
- Built an AI-powered hyperlocal marketplace featuring real-time buyer-seller chat via Socket.io, JWT authentication, and geospatial distance searching.
- Developed automated AI price estimation algorithms and wishlist triggers, handling low-latency product matching.

CodeVerse AI | *Next.js, Python, LangGraph, Qdrant, Agentic AI, Kubernetes, Docker* GitHub
- Architected an autonomous multi-agent AI coding assistant for code planning, automated editing, AST-driven debugging, and pull request reviews.
- Engineered AST-based RAG code indexing with Qdrant vector retrieval, integrating an embedded Monaco editor and isolated Docker execution environments.

College Info Bot | *React, FastAPI, LangGraph, LangChain, SQLite* GitHub | Live Demo
- Built an academic RAG assistant enabling multi-turn conversational document querying over institutional data using FastAPI and LangGraph.
- Designed persistent session management, role-restricted admin dashboards, and custom context retrieval pipelines.

FitQuest | *Flutter, Firebase, Google Maps API* GitHub
- Developed a GPS-gamified mobile fitness application featuring real-time territory acquisition, live team battles, and competitive leaderboards.
- Integrated Google Maps SDK, Firebase Authentication, and real-time Firestore database synchronization.

Education

Guru Gobind Singh Indraprastha University (MAIT) Aug 2024 – May 2028
B.Tech in Computer Science New Delhi, India
- **CGPA:** 8.9 / 10.00
- **Relevant Coursework:** Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks

Leadership & Achievements

- **Technical Co-Head, TechXtract**: Organized technical workshops, hands-on hackathons, and developer bootcamps for 300+ students.
- **Registration Lead, HackXtract 2026**: Streamlined onboarding and registration logistics for 150+ participants across 50+ competing teams.
- **Competitive Programming**: Solved 100+ Data Structures & Algorithms problems on LeetCode using C++.
